A seasoned Frontend Developer with three years of hands-on experience specializing in React.js and Angular, driven by a passion for crafting captivating user interfaces. Eager to leverage expertise in HTML and CSS to contribute to innovative projects, while continuously enhancing skills and staying abreast of emerging technologies. Seeking a dynamic environment where creativity, collaboration, and cutting-edge development converge to drive impactful solutions.

EXPERIENCE

Software Engineer   Jan 2024 - Present

6D Technologies, Technopark, Trivandrum

As a Frontend and Backend Developer specializing in **React.js and Spring Boot Java**, respectively, I've played a pivotal role in crafting a comprehensive product for the telecom industry. Within this project, I led the development of a **data insights** module aimed at presenting complex telecom data through intuitive graphical representations. Leveraging React.js, I designed engaging user interfaces with visually appealing graphs and visualizations, while on the backend, using Spring Boot Java, I ensured robustness and scalability. Collaborating closely with multidisciplinary teams, I contributed not only to development tasks but also to requirement gathering, architectural discussions, and optimization efforts, delivering a solution that enhances user experience and decision-making processes in the telecom domain.

Software Developer

Ecesis Technologies, Trivandrum   Aug 2021 - Jan 2024

As a seasoned Frontend Software Developer proficient in **React.js, Angular, MERN stack, Node.js, HTML, and CSS**, I bring extensive expertise in crafting dynamic and user-centric web applications. My dedication to excellence and innovation is reflected in achievements such as being honored with the **"Newbie of the Year Award"** and the **"Quarterly Employee Award."** Throughout my career, I have spearheaded notable projects, including the development of an e-commerce website using React.js and the creation of the **FamilyID** assessment platform, where I handled both UI design and API integration. My adaptability to emerging technologies and commitment to continuous learning drive my passion for making a tangible impact in the field of web development.

PROJECTS

KOOVS-E-commerce website

Utilizing Reactjs and other tools, I created a full front-end design from scratch. Work with backend teams and customers to identify and document product bugs and feature requests, and to execute workable fixes.

FamilyID-Assessment Platform

Angular and other tools were used to construct a complete frontend design and integrate the APIs from the backend.Work with backend teams and customers to identify and document product bugs and feature requests, and to execute workable fixes.

Travel App-MERN stack

Developed a complete project centered on customer satisfaction utilizing the Mern stack

Magik- Omantel

In the Omantel Magik project, I focused on frontend development using amCharts in ReactJS, creating various interactive charts to display revenue data and client segments. I also analyzed client requirements to develop robust data insights and drill-down capabilities, facilitating effective rule redirection and meeting the specific needs of the telecom industry.

EDUCATION   Jun 2017 - Jun 2021

Bachelor of Engineering (B.E.) - Computer science and engineering
Anna University, Nagercoil

SKILLS

Reactjs, Angular, MERN, SQL
Nodejs
HTML, CSS

HONORS & AWARDS

Employee of the Quarter   2023
Ecesis Technologies

NewBie Award   2022
